

Metal Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets with precision. It features a robust frame, integrated storage, a safety enclosure, control panels, and a ventilation system.

Product Overview

Industrial Metal Forming Solution

This industrial cutting and fold-bend machine is expertly engineered for high-precision metal forming tasks. It features a robust, durable frame integrated with convenient storage cabinets and a transparent safety enclosure, allowing operators to monitor the cutting process securely. Designed for workshop efficiency, the unit includes advanced control panels, integrated ventilation systems, and is mounted on casters for easy mobility.

Design & Construction

Frame Construction	Robust industrial-grade frame
Mobility	Yes

Safety & Operation

Safety Features	Transparent Safety Enclosure, Ventilation System, Control Panel
-----------------	---

Storage & Organization

Integrated Storage	Integrated storage cabinets included
--------------------	--------------------------------------
