

Metal Cutting Band Saw

This metal cutting band saw delivers consistent cutting performance across various metal types and thicknesses. Equipped with a coolant system and adjustable blade guides, it enhances blade life and cutting accuracy.

Overview

Industrial Metal Cutting Performance

The CS-380 is a robust metal cutting band saw engineered for precision and efficiency in demanding industrial environments. It features a powerful motor and a hydraulic downfeed control system, ensuring smooth, consistent performance across various metal types and thicknesses. Equipped with an integrated coolant system and adjustable blade guides, this machine is designed to maximize blade longevity and maintain high cutting accuracy for fabrication and machine shops.

Technical Specifications

Key Cutting Features

- Hydraulic downfeed control
- Adjustable blade guides
- Integrated coolant system with flexible nozzle

Blade Size	34 x 1.1 x 3/4
------------	----------------

Safety & Compliance

Safety Equipment	Blade Guards, Emergency Stop
------------------	------------------------------

Application

Suitable Applications

Metal Fabrication • Machine Shops • Industrial Cutting
