

Metal Cutting Band Saw Machines

These metal cutting band saw machines are designed for precise and efficient cutting of metal materials. They are suitable for a variety of metalworking applications.

Overview

Precision Metal Cutting Solutions

These industrial metal cutting band saw machines are designed to provide consistent, high-precision cuts for various workshop applications. Available in three distinct configurations, the series accommodates different operational needs, ranging from compact setups to more complex, heavy-duty table arrangements. Built with durability in mind, these machines feature robust frames and stable cutting platforms to ensure accuracy and safety during metal fabrication tasks.

Model Comparison

Available Models

Model	Configuration
RBS205	Standard gray/red base
RBS250A	Integrated motor, specialized table
RBS317	Black frame, complex table setup
