

Metal Cutting Bandsaw

This metal bandsaw is designed for precision cutting of various metal materials. It features a powerful motor, adjustable cutting angles, and a coolant system for efficient and accurate cutting.

Overview

Professional Metal Cutting Performance

The BS-128DR is a robust metal bandsaw engineered for precision cutting across a variety of metal materials. Designed for industrial applications and professional workshops, it features a durable construction that ensures long-lasting reliability and clean, accurate cuts. With integrated features like adjustable cutting angles and a dedicated coolant system, this machine provides an efficient solution for demanding metalworking tasks.

Performance Metrics

Key Performance Indicators

Voltage

Technical Specifications

Model Number	BS-128DR
Power Requirements	120V
Motor Rating	1 HP

Operational Features

Core Features

- Adjustable cutting angles for versatile operation
- Integrated coolant system to extend blade life
- User-friendly control panel for simplified operation
- Heavy-duty construction for industrial stability

Output Quality

Accurate Cuts • Clean Finish • Efficient Performance

Ideal Applications

Metal Fabrication, Industrial Workshops, Precision Cutting, Maintenance Shops
