

Metal Cutting Chop Saw

This metal cutting chop saw is designed for precise and efficient cutting of various metal materials. It features a robust construction with a powerful motor, safety guard, pneumatic cylinder, foot pedal operation, adjustable cutting angle, and a secure vise.

Overview

Industrial Metal Cutting Solution

This metal cutting chop saw is engineered for precise and efficient cutting across a variety of metal materials. Featuring robust construction and a powerful motor, it is designed to handle demanding industrial and workshop applications. The machine includes integrated safety features and precision controls, such as a pneumatic cylinder for controlled cutting and a secure vise system, ensuring consistent and accurate results.

Technical Specifications

Adjustment Controls

- Hand wheel for cutting angle adjustment
- Integrated vise for workpiece securing

Cutting Mechanism	Pneumatic cylinder for controlled cutting action
Operation Method	Foot pedal operation

Safety & Design

Build Quality

Robust construction • Industrial grade

Safety Features	Yellow safety guard, Pneumatic control
