

Metal Cutting Chop Saw

The Metal Cutting Chop Saw is engineered for precise and efficient cutting of metal materials. It features a robust motor, high-speed cutting blade, and adjustable vise for secure workpiece placement.

Overview

High-Performance Metal Cutting

This Metal Cutting Chop Saw is engineered for precision and efficiency in professional metalworking environments. Featuring a robust motor and a high-speed cutting blade, it effortlessly slices through steel, aluminum, and iron. Designed with safety and stability in mind, it includes an adjustable vise for secure workpiece holding and an integrated spark guard.

Key Features

Safety Equipment

Spark Guard • Sturdy Base

Suitable Applications

Metalworking, Fabrication, Construction

Technical Specifications

Compatible Materials

- Steel
- Aluminum
- Iron

Workpiece Handling

Adjustable vise for secure and consistent cuts
