

Metal Cutting Chop Saw

This metal cutting chop saw is designed for precision cutting of various metal profiles. It features a powerful motor, adjustable miter angles, and a sturdy base for stability.

Overview

Precision Metal Cutting Solution

The CS-315 and CS-350 series are robust metal cutting chop saws engineered for high-precision cutting across a variety of metal profiles. Equipped with a powerful motor and an integrated cooling system, these units are designed to enhance cutting performance while significantly extending blade longevity. With adjustable miter angles and a sturdy, stable base, they are the ideal choice for professional fabrication shops, metalworking facilities, and maintenance departments.

Performance & Features

Key Features

- Powerful motor for efficient material processing
- Adjustable miter angles for versatile cutting
- Integrated cooling system for blade longevity
- Sturdy base design for maximum stability
