

Metal Cutting Circular Saw Blade

This high-speed circular saw blade is designed for precision cutting of metal. Its durable alloy steel construction ensures extended life and resistance to wear.

Product Overview

High-Performance Metal Cutting Solution

This high-speed circular saw blade is engineered for precision cutting of various metal types, including pipes, profiles, and solid materials. Constructed from durable alloy steel, it features optimized tooth geometry designed to deliver clean, burr-free cuts, significantly reducing the need for secondary finishing. Heat-treated for enhanced hardness and toughness, this blade ensures consistent, reliable performance even under demanding industrial conditions.

Technical Specifications

Material Composition	Durable Alloy Steel
Performance Features	High-Speed Cutting, Burr-Free Finish, Heat-Treated, Wear Resistant

Applications

Suitable Materials

- Metal Pipes
- Metal Profiles
- Solid Metal Materials
