

Metal Cutting Discs

These metal cutting discs are designed for use in cutting and machining applications. They come in a variety of sizes and finishes.

Product Overview

High-Performance Cutting Solutions

These precision-engineered metal cutting discs are designed for demanding machining and fabrication environments. Featuring a versatile multi-hole mounting system, they offer excellent compatibility with various cutting equipment. The range includes diverse surface treatments and compositions, ensuring optimal performance across different metal types and cutting applications.

Technical Specifications

Intended Use

- Metal cutting
- Industrial machining
- Fabrication

Key Features

Multi-hole mounting • Variable composition • Precision machined

Mounting Configuration

Central arbor hole with secondary bolt pattern

Surface Finishes

Gold, Silver, Iridescent
