

Metal Cutting Wheel

This cutting wheel is designed for metal and inox cutting applications. The reinforced wheel ensures durability and safety during operation, with a maximum operating speed of 4400 RPM.

Overview

Professional Metal Cutting Solutions

This high-performance cutting wheel is engineered for precision and durability in metal and inox cutting applications. Designed for industrial and professional use, the reinforced construction enhances safety and longevity during heavy-duty operation. It meets stringent safety standards, ensuring reliable performance across a wide range of cutting tasks.

Technical Specifications

Maximum Operating Speed

4400 RPM

Max RPM

80 m/s

Max Peripheral Speed

Model Number

WT0304039

Certifications

MPA
