

Metal Cutting Wheel

This cutting wheel is designed for metal cutting applications. It provides efficient and precise cutting performance.

Product Overview

General Purpose Metal Cutting

This professional-grade cutting disc is engineered for efficient and precise metal cutting applications. Designed for compatibility with standard angle grinders, it offers reliable performance across a wide range of industrial and workshop tasks. The disc adheres to safety standards, ensuring consistent results for demanding metal fabrication work.

Technical Specifications

Max Operating Speed

80 m/s

Max Speed

Compliance

EN12413, A30S BF-T41

Product Variants

Available Models & Dimensions

Code	Diameter (mm)	Thickness (mm)	Bore (mm)	Max RPM
CADG-MC2522115	115	2.5	22.23	13300
CADG-MC3022115	115	3	22.23	13300
