Product Overview

Professional Electrical Distribution Enclosure

This durable metal distribution box is engineered to provide robust protection and efficient organization for critical electrical components. Designed for versatility, it serves as a secure housing for circuit breakers, wiring, and associated electrical equipment in both residential and commercial environments. Its sturdy construction ensures reliable performance and safety, while the user-friendly design facilitates straightforward installation and ongoing maintenance.

Technical Specifications

Certifications

CE

Compatible Breaker Series

- MN11-1
- MN11-2

Circuit Capacity

16 Channels

Max Circuits

Supported Breaker Ratings

C6, C10, C20, C25, C32, C40, C63, C100

Design & Build

Key Features

- Hinged access door
- Secure latching mechanism
- Robust metal construction
- Organized internal layout

Application

Suitable Environments

Residential, Commercial, Industrial
