

Metal Fastening Bolts

These metal bolts are precision-engineered with threaded ends and stepped diameters. They are designed for secure fastening in machinery and industrial applications.

Product Overview

Precision-Engineered Fastening Solutions

These metal fastening bolts are designed for high-performance industrial and machinery applications. Featuring precision engineering with stepped diameters and smooth, polished surfaces, they ensure secure and reliable fastening. Manufactured to exacting standards, these components are built for durability in demanding environments.

Technical Specifications

Material Type

Metal • Industrial Grade

Design Features

- Stepped diameter design
- Threaded ends
- Polished surface finish

Part Identifier

9611
