

# Metal Fastening Screws

These metal screws are designed for fastening materials together. They come in a variety of head types and finishes.

## Product Overview

### Industrial Grade Metal Fasteners

These high-quality metal fastening screws are designed for versatility across various professional industries. Featuring a wide range of head styles including countersunk and cylindrical, they offer reliable solutions for woodworking, construction, and machinery assembly. Available in multiple finishes, these fasteners provide a robust connection for demanding fastening applications.

## Technical Specifications

### Head Styles

- Countersunk
- Cylindrical

### Surface Finishes

Silver • Blue • Gold

### Material

Steel, Stainless Steel

## Applications

### Primary Applications

- Woodworking
- Construction
- Machinery Assembly
