

Metal Forming Machine with Integrated Cutter and Tongs

This specialized machine is designed for metal forming applications. It features an integrated cutting and gripping mechanism, suitable for precision manufacturing and fabrication processes.

Overview

Precision Industrial Metal Forming

This specialized metal forming machine is engineered for high-precision fabrication tasks, integrating both cutting and forming capabilities. Designed for demanding industrial environments, it features a robust frame construction and an integrated coolant system to manage heat during intense processing cycles. The intuitive control panel allows for precise adjustments, making it an essential asset for manufacturing workflows requiring consistent, reliable output.

Technical Specifications

Country of Origin

China

Machine Type

Metal Forming and Cutting Machine

Cooling System

Yes

Key Features

Core Capabilities

- Integrated cutting head
- Metal forming dies
- Precision control interface
- Heat management system
