

Metal Frame Windshield Wiper Blade

High-performance metal windshield wiper blades provide optimal visibility and durability. The precision-engineered rubber blade ensures streak-free wiping and clear vision in all weather conditions.

Product Overview

High-Performance Metal Frame Wiper Blade

This metal frame windshield wiper blade is engineered for durability and consistent performance across all weather conditions. It features a high-elasticity carbon steel frame that maintains uniform pressure for streak-free visibility. The aerodynamic spoiler design effectively converts wind force to maximize windshield contact, while the chamfer-edge end cap provides added protection against ice scraper damage.

Key Features

Main Features

- Aerodynamic spoiler design for maximum windshield contact
- High-elasticity carbon steel frame for consistent pressure
- Chamfer-edge end cap for ice scraper damage protection
- Pre-installed adapter for quick replacement

Logistics & Packaging

Packaging Configuration

Unit	Quantity
Individual Unit	1 piece per Color Box
Inner Box	25 pieces
Master Carton	50 pieces
20ft Container	30,000 pieces
40HQ Container	72,000 pieces

Lead Time Estimates

30 days

1-5,000 Pieces
