

Metal Garden Rake for Leaf and Debris Collection

This metal rake is designed for gathering leaves, hay, and other loose materials. It features a sturdy handle socket and durable metal construction for efficient raking.

Product Overview

Professional Grade Garden Rake

This durable metal garden rake is engineered for high-performance leaf and debris collection in agricultural, gardening, and landscaping environments. Featuring a robust multi-tine design, it ensures efficient gathering of loose materials while maintaining long-term structural integrity. Its universal handle socket allows for flexible attachment to a variety of handle materials, making it a versatile tool for professional maintenance tasks.

Technical Specifications

Compatibility

- Wooden handles
- Metal handles

Key Features

Multi-tine design • Sturdy handle socket • Corrosion-resistant coating

Primary Material

Durable Painted Metal

Applications

Agriculture, Gardening, Landscaping
