Product Overview

High-Efficiency Metal Halide Lighting

These metal halide lamps are engineered with durable materials to ensure excellent light transmission and long-term reliability. Designed for high luminous efficiency and low power consumption, they provide a powerful lighting solution for demanding environments. They are widely utilized across infrastructure sectors, including highways, airports, docks, and large-scale public squares.

Technical Specifications

Available Wattages

- 70
- 100
- 150
- 250
- 400
- 1000
- 2000

Lamp Technology

High-Intensity Discharge (HID)

Operating Requirements

Requires Ballast, High Voltage Operation

Key Features

Performance Highlights

33 Years

Years of Industry Focus

Applications

Primary Use Cases

Roadways • Highways • Airports • Docks • Stations • Square Lighting • Industrial • Commercial • Horticulture
