

Metal Mounting Tie for Lamps and Lanterns

Metal mounting tie designed for use in sling chain kits. It is suitable for iron and die-casting applications.

Product Overview

Versatile Mounting Solution

This metal mounting tie, commonly referred to as a bail, is a professional-grade component designed for use in sling chain kits for lighting fixtures. Crafted from durable materials such as iron and die-cast alloys, it ensures reliable and secure attachment for various lanterns and lamps. Its design is optimized for versatility, accommodating a wide range of mounting applications in both residential and commercial lighting projects.

Technical Details

Component Type	Mounting Tie (Bail)
Construction Materials	Iron, Die-cast Alloy
Primary Application	Sling chain kits for lamps and lanterns
