

Metal Pipe Clamp with Attachment Screw

This metal clamp is designed to secure pipes and tubes. It includes an attached threaded screw for insertion into surfaces, providing secure attachment and support.

Product Overview

Industrial Pipe Support Solution

This metal pipe clamp with an integrated attachment screw is designed for secure mounting and support of pipes and tubes in industrial or plumbing environments. Its robust, circular design ensures a firm grip, while the threaded screw allows for straightforward installation into various surfaces. Built with corrosion-resistant materials, it offers long-term reliability for demanding infrastructure applications.

Technical Details

Material Finish

Galvanized • Corrosion-Resistant

Component Type

Pipe Clamp with Attachment Screw

Application Suitability

Plumbing, Industrial, Pipe Support
