

Metal Plated Wired Microphone

This metal-plated wired microphone is designed for professional audio applications. It has a high-quality capsule for clear sound reproduction and a low-noise cable for optimal signal transmission.

Product Overview

Professional Performance Audio

The PT-713 Metal Plated Microphone is a robust solution designed for high-quality audio reproduction in professional environments. Featuring advanced VHF frequency filtering and dynamic uni-directional sensing, it minimizes interference while maintaining exceptional sound clarity. Its low-voltage design and high-frequency stability make it a reliable choice for vocal performances, public speaking, and recording applications.

Acoustic Performance

Frequency Response	40Hz - 20KHz
Sensitivity	-74 dB
Impedance	600 Ω \pm 30%

Wireless Specifications

Frequency Range	VHF 210-270MHz
Working Distance	80 m
Dynamic Range	90 dB

Construction & Power

Construction Material	Metal Plated, Zinc Alloy
Microphone Battery	AA 1.5V x 2
Consumption Power	2 W
