

Metal Profile Forming Machine

This heavy-duty machine is designed for shaping and bending metal profiles. It features adjustable rollers and a screw-driven top roller for precise forming of various shapes.

Overview

Industrial Metal Profile Forming

This heavy-duty metal forming machine is engineered for precise shaping and bending of various metal profiles. Built with a robust frame and high-quality components, it ensures stability and durability for demanding industrial metalworking environments. The system features adjustable rollers and a screw-driven top mechanism, offering operators the flexibility to achieve accurate forming results across a wide range of applications.

Technical Specifications

Included Accessories

- Interchangeable dies
- Adjustable rollers

Machine Type	Metal Profile Forming Machine
--------------	-------------------------------

Forming Mechanism	Screw-driven top roller
-------------------	-------------------------

Adjustability	Yes
---------------	-----

Application

Ideal Use Cases	Industrial Metalworking, Profile Bending, Metal Shaping
-----------------	---

Construction

Build Quality

Heavy-duty • Robust Frame
