

Metal Rivet Fastener for Motorcycle Parts

This metal rivet is designed for joining motorcycle components securely. It consists of a smooth shaft and a domed head, ensuring a robust and lasting connection.

Product Overview

High-Strength Mechanical Fastening Solution

This metal rivet fastener is engineered for robust, permanent joining applications within motorcycle assemblies. Featuring a smooth cylindrical shaft and a durable domed head, it provides exceptional strength and reliability for critical components. Designed for ease of installation, the tail end is deformed to create a secure second head, ensuring a long-lasting joint that withstands vibration and stress.

Technical Details

Primary Application

Motorcycle Parts • Permanent Assembly • Structural Joining

Fastener Type	Mechanical Rivet
Head Style	Domed
Material Composition	Metal, Aluminum/Steel
