

Metal Roll Container Trolley with Hinged Gate

This metal roll container trolley is designed for transporting goods in warehouses and retail stores. It features a hinged gate on one side for easy access.

Product Overview

Versatile Logistics Solution

This metal roll container trolley is a robust and flexible solution designed for efficient goods transport within warehouses, retail environments, and distribution centers. Featuring a durable wire mesh construction and a convenient hinged gate, it provides both security and easy access for loading and unloading items. The maneuverable four-caster base ensures smooth mobility, making it an essential tool for streamlining inventory logistics and material handling.

Technical Specifications

Key Features

- Hinged gate for easy access
- Rectangular base design
- Four swivel casters

Model Number	TC4601
Construction Material	Metal, Wire Mesh

Application Areas

Primary Use Cases

Warehousing • Retail Stores • Distribution Centers
