

## Metal Shaving Plane Blades 38mm

These metal blades are designed for use in shaving planes and similar cutting tools. Each blade features a sharp, beveled edge and a slotted section for mounting within a tool assembly.

### Product Overview

#### Precision Metal Shaving Plane Blades

These high-quality metal shaving plane blades are engineered for precision woodworking and material removal tasks. Featuring a robust construction, they provide a sharp, durable edge suitable for fine-tuning surfaces. Designed for compatibility with standard plane assemblies, these 38mm blades are an essential component for professional carpentry and woodworking workshops.
