

Metal Shearing and Folding Machine

This heavy-duty machine is designed for industrial metal shearing and folding operations. It features a robust construction for durability and precise material forming.

Overview

Industrial Metal Processing Solution

This heavy-duty machine is engineered for high-precision metal shearing and folding operations in industrial environments. Its robust construction ensures durability during demanding tasks, while the integrated wheel system allows for convenient mobility across the workshop floor. Designed to streamline metal forming processes, it provides a reliable solution for professional fabrication needs.

Certifications

Quality Standards

ISO 9001

Features

Core Operations

- Metal shearing
- Metal folding
- Metal bending

Mobility

Yes

Performance

Construction Type

Heavy-duty • Industrial
