

Metal Shearing and Folding Machine

This cutting and fold-bend machine is designed for metal forming, specifically shearing. It offers precise cutting and bending capabilities for various metalworking applications.

Overview

Precision Metal Forming Solution

This versatile metal shearing and folding machine is engineered for high-precision metal forming tasks, including both cutting and bending operations. Designed for industrial environments such as metal fabrication shops and manufacturing facilities, it provides the accuracy and reliability required for professional metal processing. Its robust construction ensures consistent performance, helping to enhance overall productivity in your fabrication workflow.

Technical Capabilities

Suitable Applications

- Metal fabrication shops
- Manufacturing facilities
- Industrial metal processing

Primary Functions

Shearing, Folding, Bending, Cutting

Performance

Key Performance Benefits

High Accuracy • Enhanced Productivity • Versatile Forming
