

Metal Shearing and Folding Machine

This high-precision machine is designed for cutting and folding metal in forming applications. It provides advanced control and robust construction for efficient and accurate material processing.

Overview

High-Precision Metal Forming Solution

This high-precision metal shearing and folding machine is engineered for demanding metal forming applications. It features robust construction to ensure long-term reliability and consistent processing results. Designed with advanced control systems, this machine provides the accuracy and efficiency required for professional metal fabrication tasks.

Technical Specifications

Suitable Applications

- Metal forming
- Material processing
- High-precision cutting
- Bending tasks

Model Identifier	PLC-4000
Machine Type	Shearing, Folding, Bending
