

Metal Sheet Cutting and Bending Machine

This cutting and bending machine is designed for metal forming operations, specifically shearing. It is suitable for industrial applications requiring precise cutting and bending of metal sheets or plates.

Overview

Industrial Metal Forming Solution

This high-performance metal sheet cutting and bending machine is engineered for precision metal fabrication tasks. It combines shearing and bending capabilities into a single, versatile unit suitable for demanding industrial applications. Designed for consistency and accuracy, this machine allows operators to achieve precise cutting angles and bending radii on various metal plates, streamlining production workflows.

Technical Capabilities

Best For

- Industrial metal fabrication
- Sheet metal processing
- Custom metal plate forming

Core Functions

Metal Shearing, Sheet Bending, Plate Folding, Precision Forming

Performance Metrics

Precision Features

1 deg

Adjustable Cutting Angles

1 mm

Adjustable Bending Radii
