

Metal Sheet Cutting and Bending Machine

This cutting and bending machine is designed for metal forming operations. The shearing machine is suitable for cutting and bending metal sheets with precision.

Product Overview

Industrial Metal Forming Solution

This metal sheet cutting and bending machine is engineered for precision fabrication in industrial environments. It features a robust design with a large flatbed work area, allowing for efficient handling of various sheet sizes. Equipped with a full-width cutting head and an integrated control panel, this machine ensures accurate cutting and bending operations for demanding metalworking tasks.

Technical Capabilities

Application Suitability

- Industrial metal fabrication
- Precision sheet metal operations
- High-volume forming tasks

Core Functions

Metal Cutting, Sheet Bending, Sheet Folding, Metal Forming

Design Features

Control System

Integrated Control Panel • Manual Operation

Work Area

Large flatbed design
