Overview

Precision Metalworking Solution

This cutting and bending machine is a precision-engineered tool designed for accurate metal forming tasks. It features a robust heating element and a durable cutting mechanism, allowing for efficient shearing and bending of metal sheets. With integrated safety features like a protective guard and temperature control, it is an ideal solution for various professional metalworking applications.

Technical Specifications

Key Features

- Integrated heating element
- Durable cutting mechanism
- Temperature control switch
- Protective safety guard
- Ergonomic handle design

Suitable For

Professional Use, DIY Projects, Metal Shearing, Metal Bending

Design Type

Compact and Portable
