

Metal Sheet Cutting and Folding Machine

This heavy-duty machine is designed for metal forming applications, providing precision shearing and bending of metal sheets. It incorporates a multi-roller system for accurate material handling and shaping.

Overview

Industrial Metal Processing Solution

This heavy-duty cutting and fold-bend machine is engineered for precision metal forming applications. Designed for demanding industrial environments, it features a robust frame and powerful hydraulic components to ensure reliable performance. The machine incorporates a multi-roller system, facilitating accurate material handling and consistent shaping results for various metal sheet projects.

Technical Specifications

Construction Features

- Robust heavy-duty frame
- Powerful hydraulic system
- Multi-roller material handling system

Machine Type	Cutting and Fold-Bend Machine
Primary Applications	Metal Shearing, Metal Bending, Sheet Forming
