

Metal Sheet Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets. Its robust construction and control panels facilitate precise material handling.

Overview

Industrial Metal Forming Solution

This heavy-duty machine is engineered for high-volume metal forming operations, combining cutting and folding capabilities into a single versatile unit. Its robust construction ensures stability during intensive manufacturing tasks, while precise clamping mechanisms allow for accurate material handling. Designed for industrial environments, it features integrated safety barriers to support secure and efficient production workflows.

Technical Specifications

Machine Type	Metal Sheet Cutting and Folding Machine
Primary Applications	Metal Cutting, Metal Bending, Sheet Metal Forming

Design & Safety

Safety Features

Safety Barriers • Industrial Grade

Construction	Heavy-duty industrial frame
