

Metal Sheet Cutting and Folding Machine

This machine integrates robust shearing capabilities with accurate bending functionality. Its sturdy construction ensures stability and durability, while user-friendly controls allow for efficient operation and precise adjustments.

Product Overview

High-Performance Fabrication

This high-performance cutting and fold-bend machine is expertly designed for precision metal forming. It integrates robust shearing capabilities with accurate bending functionality, offering a versatile solution for diverse metal fabrication needs. Built with sturdy construction for stability and durability, it features user-friendly controls that allow for efficient operation and precise adjustments, making it ideal for creating complex shapes with minimal material waste.

Capabilities

Key Benefits

- Robust shearing capabilities
- Accurate bending functionality
- Minimal material waste
- Stable and durable construction
- User-friendly controls

Core Functions

Metal Cutting, Metal Folding, Metal Bending, Precision Forming
