

Metal Sheet Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets. It integrates two essential metalworking processes into a single unit, streamlining production.

Product Overview

Professional Metal Processing

This industrial-grade machine is engineered for high-precision metal sheet cutting and folding operations. Designed for efficiency and durability, it provides a reliable solution for workshops requiring consistent performance in metal fabrication. Its robust construction ensures stability during intensive processing tasks.

Capabilities

Primary Functions	Capabilities
	Metal Cutting, Sheet Folding, Metal Bending
