

Metal Sheet Cutting and Folding Machine

This metal forming machine is designed for cutting and folding metal sheets. It is suitable for industrial applications requiring precise metal cutting and bending.

Overview

Industrial Metal Forming Solution

This robust metal sheet cutting and folding machine is engineered for precision industrial applications. Featuring an integrated control panel with a digital display, it offers streamlined operation for both cutting and bending tasks. Designed with safety and durability in mind, this equipment provides a reliable solution for high-volume metal fabrication environments.

Technical Specifications

Core Features

- Metal sheet cutting
- Metal sheet folding
- Digital control panel interface
- Safety hazard protection system

Machine Type	Shearing and Folding Machine
Safety Standards	Safety Hazard Protection, Industrial Grade
