

Metal Sheet Cutting and Folding Machine

This machine is designed for accurately cutting and folding metal sheets. It is suitable for various applications requiring precise sheet metal fabrication.

Product Overview

Professional Metal Processing Solution

This metal sheet cutting and folding machine is engineered for precision and durability in demanding industrial environments. Designed to streamline fabrication workflows, it combines high-strength construction with robust performance capabilities. This versatile unit is an essential asset for workshops and manufacturing facilities requiring reliable, high-quality metal forming and cutting operations.

Certifications & Standards

Compliance

CE • GS • TUV • SUD

Operational Features

Key Capabilities

- Electric operation for consistent performance
- Durable construction for heavy-duty use
- High-strength components
- Remote control operation
- Emergency stop functionality
- Overload protection system

Safety Features

Emergency Stop, Overload Protection
