

Metal Sheet Cutting and Folding Machine

This cutting and folding machine is designed for precise metal forming. It features a robust construction with a combination of rollers and cutting blades for efficient material processing.

Overview

Precision Metal Processing

This metal sheet cutting and folding machine is engineered for high-precision metal forming and efficient material processing. Featuring a robust construction, it integrates both rollers and cutting blades to handle demanding fabrication tasks. The inclusion of a digital control panel allows for precise parameter adjustments, ensuring consistent results for professional workshop environments.

Key Features

Design & Build

- Robust construction
- Digital control panel
- Adjustable feet for stability
- High-visibility color scheme

Equipment Type

Metal Forming • Cutting & Folding

Safety Mechanisms

Protective Guards, Emergency Stop
