

# Metal Sheet Cutting and Folding Machine

This industrial machine cuts and folds metal sheets. It is designed for heavy-duty metal forming with a precise control panel and integrated cooling system.

## Overview

### Industrial Metal Forming Solution

This industrial cutting and fold-bend machine is expertly designed for heavy-duty metal forming applications. It offers a robust construction paired with a precise control panel and an integrated cooling system, ensuring reliability in demanding environments. Perfectly suited for shearing and bending metal sheets, the machine delivers high accuracy and efficiency, while incorporating multiple operational modes and advanced safety features to protect operators.

## Technical Specifications

Model Number	RSN-2500
Capabilities	Shearing, Bending, Metal Forming

## Features

### Key Features

- Robust heavy-duty construction
- Precise control panel interface
- Integrated cooling system
- Multiple operational modes
- Advanced safety features
