

Metal Sheet Cutting and Folding Machine

This shearing machine is used for cutting and fold-bending metal sheets. It is designed for precision and efficiency in metal forming processes and features a robust construction for durability and reliable performance in industrial applications.

Overview

Precision Metal Forming Solution

This industrial shearing and folding machine is engineered for high-precision cutting and bending of metal sheets. Its robust construction ensures long-term durability and reliable performance in demanding metal fabrication environments. Designed to streamline metal forming workflows, this unit provides the efficiency required for professional-grade production.

Technical Specifications

Application

Industrial • Metal Forming

Primary Function

Cutting, Folding, Bending, Shearing

Build Quality

Robust heavy-duty construction
