

Metal Sheet Folding and Cutting Machine

This machine is designed for folding and cutting metal sheets. It provides efficient and precise processing for various metal fabrication applications.

Product Overview

Professional Metal Sheet Folding and Cutting Machine

This industrial-grade machine is engineered for precision metal sheet fabrication, combining robust cutting and folding capabilities in a single unit. Designed for high-performance workshops and manufacturing environments, it ensures clean, accurate results for various sheet metal processing tasks. Its durable construction supports long-term operational reliability for demanding production schedules.

Technical Specifications

Machine Type	Metal Sheet Folding and Cutting Machine
Primary Applications	Sheet Metal Cutting, Sheet Metal Folding, Industrial Fabrication
