

Metal Sheet Folding Machine

This machine is designed for folding sheet metal with precision. It ensures accurate and consistent folds for various metalworking applications.

Overview

Robust Three-Wheeled Transport Solution

This versatile three-wheeled motorcycle is engineered for efficient cargo transport, featuring a durable design suitable for various operational needs. It is powered by a reliable engine system with both air-cooled and water-cooled options available to match performance requirements. With a focus on safety and maneuverability, the vehicle incorporates advanced braking systems and a fully floating rear axle for reliable torque transmission.

Performance & Engine

Maximum Net Power

| | |
|------------------------------|--------------------------------|
| 10.2 kW Air-Cooled | 10.3 kW Water-Cooled |
|------------------------------|--------------------------------|

| | |
|-----------------------|---------------|
| Maximum Speed | e60km/h |
| Engine Configurations | 150, 175, 250 |

Dimensions & Cargo

| | |
|----------------------|----------------------|
| Cargo Box Dimensions | 1900 x 1300 x 310 mm |
| Tire Specifications | 5.00-12 (Front/Rear) |

Safety & Control

Braking System

- Front disc brake
- Rear drum brake
- Vacuum-assisted hydraulic braking

| | |
|---------------------|----------|
| Maximum Noise Level | 80 dB(A) |
|---------------------|----------|

Design & Aesthetics

Available Colors

Champagne Gold • Water-reflecting Blue • European Blue

Key Features

- Imitation crystal headlights
- Streamlined micro-card cab
- High-performance carburetor
- Fully floating rear axle
