

Metal Sheet Shearing Machine

This metal sheet shearing machine is designed for precise and efficient cutting. It features a flat working surface with supports and a control panel for operation.

Overview

Industrial Metal Sheet Shearing Solution

This heavy-duty metal sheet shearing machine is engineered for precision and efficiency in industrial metal fabrication environments. Featuring a robust, flat working surface with integrated supports and guides, it ensures accurate positioning for consistent cutting results. Equipped with a dedicated control panel and display interface, this machine offers streamlined operation for demanding manufacturing tasks.

Machine Specifications

Machine Type

Hydraulic • CNC Compatible

Control System

Integrated digital control panel with display screen

Design Features

Design & Build

- Heavy-duty industrial construction
- Large flat working surface
- Integrated sheet supports
- Precision positioning guides

Model Identifier

ZYJC
