

Metal Skid Roller for Heavy Machinery

These metal skid rollers are designed for heavy-duty applications, providing exceptional durability and smooth operation. Engineered with precision and manufactured from high-quality materials, they offer superior resistance to wear, corrosion, and impact.

Overview

Heavy-Duty Metal Skid Rollers

These high-performance metal skid rollers are engineered for demanding industrial and construction environments. Designed to provide reliable support and smooth movement, they offer superior resistance to wear, impact, and corrosion. By enhancing the efficiency and reliability of heavy machinery, these rollers help minimize downtime and reduce long-term maintenance costs.

Technical Specifications

Load Rating

6000 kg
Capacity

Key Features

- High-strength metal construction
- Corrosion resistant
- Precision engineered for smooth operation
- Impact resistant for heavy-duty use

Compatible Equipment

Skid Steer Loader, Construction Equipment, Industrial Machinery

Compliance

Compliance Standards

Industrial Standard Compliant
