

Metal Threaded Adapter

This precision-machined metal adapter features internal threading and a knurled exterior. Constructed from durable metal alloy, this adapter is designed for secure and reliable connections in various industrial applications.

Product Overview

Precision-Engineered Metal Adapter

This precision-machined metal threaded adapter is engineered for secure and reliable connections in demanding industrial environments. Constructed from a durable metal alloy, it is specifically designed to maintain integrity in fluid or gas transfer systems. The inclusion of a knurled exterior ensures enhanced grip, facilitating easy installation and removal while ensuring leak-proof performance and long-lasting durability.

Technical Specifications

Suitable Applications

- Fluid transfer systems
- Gas transfer systems
- Industrial connection points

Material	Durable metal alloy
Design Features	Knurled exterior, Internal threading, Precision-machined

Performance

Key Performance Indicators

1 Status

Leak-proof Performance
