

Metallic Slip-On Flange for Piping Systems

This slip-on flange is used in piping systems to connect pipes or attach equipment. It has a ring-shaped design with bolt holes for secure fastening.

Overview

Professional Piping Solution

This metallic slip-on flange is engineered for reliable use in industrial piping systems. Designed for secure connectivity, it features a robust ring-shaped construction with multiple bolt holes to ensure a tight, leak-resistant fit. It serves as an essential component for connecting pipes or attaching equipment within various fluid handling infrastructures.

Technical Details

Material

Metallic

Primary Application

- Piping systems
- Equipment attachment
- Secure pipe connection

Flange Type

Slip-on
