

# Metalworking Band Saw

This metalworking band saw is a robust and precise cutting machine designed for various metalworking applications. Its heavy-duty construction ensures stability and accurate cuts, while the powerful motor and variable speed control provide optimal cutting performance.

## Overview

### Precision Metalworking Solution

The GB400 Band Saw is a robust and precise cutting machine engineered for demanding metalworking applications. Its heavy-duty construction ensures exceptional stability and long-term durability, while the powerful motor and variable speed control deliver optimal cutting performance across a variety of materials. Equipped with an integrated coolant system and versatile angle cutting capabilities, this machine is designed to enhance efficiency and extend blade life in professional workshop environments.

## Key Performance Metrics

### Cutting Versatility

**400 GB400**

Model Capacity

## Technical Features

### Core Features

- Heavy-duty construction for stability
- Variable speed control
- Integrated coolant system
- Adjustable workpiece vise
- Angle cutting capability

## Safety & Compliance

### Safety Systems

Blade Guards, Emergency Stop
