

Metalworking Lathe Machine

This precision metal lathe is designed for turning, facing, and threading operations. It features a robust cast iron bed for stability and vibration dampening.

Overview

Precision Metalworking Lathe

This precision metal lathe is engineered for versatile turning, facing, and threading operations. Built with a robust cast iron bed, it ensures superior stability and vibration dampening during heavy-duty tasks. The machine includes a variable-speed spindle drive and a digital readout (DRO) to guarantee accuracy and optimal cutting speeds for various materials like steel, aluminum, and plastics.

Technical Features

Safety Equipment

- Chuck Guard
- Emergency Stop Button

Core Operations

Turning, Facing, Threading

Bed Material

Cast Iron

Performance

Spindle Drive Type

Variable-speed

Cooling System

Yes

Positioning System

Digital Readout (DRO)

Compatibility

Supported Materials

Steel • Aluminum • Plastics
