

# Metalworking Lathe

This precision metal lathe is designed for turning, facing, and threading operations. It features a robust construction with a cast iron bed for stability and vibration dampening.

## Overview

### Precision Metalworking Lathe

This precision metalworking lathe is designed for versatile turning, facing, and threading operations. Built with a robust cast iron bed, it ensures exceptional stability and vibration dampening during heavy-duty machining. The machine features a powerful 7.5kW motor and a 12-step variable speed drive, providing optimal cutting performance across a wide range of materials and tasks.

## Capacity & Dimensions

Swing Over Bed	510 mm
Distance Between Centers	1000mm, 1500mm, 2000mm, 3000mm

## Performance

### Spindle Speed

**25 rpm**

Min Speed

**2000 rpm**

Max Speed

**12 steps**

Speed Steps

Main Motor Power	7.5 kW

## Logistics & Weight

### Shipping Specifications

Distance Between Centers (mm)	Packing Size (LxWxH mm)	Gross Weight (kg)
1000	2450x1190x1740	2460
1500	2900x1190x1740	2550
2000	3400x1190x1740	2840
3000	4400x1190x1740	3270
