

Meter-Gauge Welded Bogie for Rail Vehicles

This meter-gauge welded bogie is engineered for railway vehicles in Thailand. Its robust welded frame and suspension system ensure a stable and smooth ride.

Overview

Robust Meter-Gauge Rail Solution

This meter-gauge welded bogie is engineered specifically for railway vehicles operating on meter-gauge track networks. Featuring a heavy-duty welded frame construction, it offers exceptional durability and structural integrity for demanding rail environments. The assembly integrates advanced suspension and braking systems designed to ensure a smooth, stable, and reliable ride performance.

Technical Specifications

Regional Standards

Thailand Railway Standards

Track Gauge	Meter-gauge
Frame Construction	Welded steel frame
Suspension Type	Coil Spring Suspension, Stable Ride Geometry

Performance Features

Core Capabilities

1 Meter-Gauge
Track Compatibility

100 % Welded
Structural Integrity
